

AUTOMOTIVE TECHNOLOGY

Prodrive works with the world's vehicle manufacturers to help them create cars consumers want. We develop innovative technology which improves the performance, safety and desirability of the products of the world's vehicle manufacturers.

We attract the best people in all areas of the business who want to work in a demanding, but rewarding environment. The company brings out the very best in people and in return gives them an opportunity to use their skills to the full.

Due to a number of exciting new projects and growth of the business in 2008, we are looking to recruit a number of key positions within our automotive technology business based in Warwickshire. These include:

Design engineer – chassis

Development engineer – chassis

Design engineer – transmissions

Design engineer – suspension

Project engineers

Design engineer – driveline

Project engineer – interior and exterior trim

If you feel you have the relevant skills and experience we would like to hear from you.

Please apply directly through our website or for further information contact Jenny Lloyd on 01295 754000.
